

Intelligence doesn't stop at software.

We're looking for researchers to enable the next step of hardware acceleration — teaching AI to design silicon that is both correct and optimal. Contact us if you are interested.

WHILE YOU'RE HERE

Our platform puts real silicon a few lines of Python away: cloud FPGAs, open-source toolchains, and RLVR environments where agents learn to design chips at the transistor level.

cloud FPGAs · open toolchains · verifiable reward signals

```
$ pip install manhattan-reasoning-gym
